# Drug Testing Supplies

## Tamper-Proof Collection Bottle

Each sterile bottle is individually packaged and contains a leak-proof cap, label, an integrity seal, and tamper evident tape to ensure sample integrity. Meets US Postal Service and private courier specifications for transporting urine specimens.

## Secure Specimen Bottle

This economical container includes a leak-proof lid for storing specimens. Meets US Postal Service and private courier specifications for transporting urine specimens.

## Self-Adhesive Temperature Strip

A temperature reading taken within four minutes of obtaining a viable specimen should be between 90°-100° F. Attach to any specimen container

## Single-Use Latex Gloves

Use these gloves for working with urine or saliva specimens. Strong latex construction resists tears and rips. Available in small, medium, and large.

## Blue-Tab

Add one or two blueing tablets to a urinal or toilet to reduce the opportunity to adulterate a urine specimen. Add them directly to the bowl after each flush. Ideal for commercial toilets without water tanks.

## Drug Testing Supplies
