RBT VXL

Full Keyboard for Convenient Data Input

The RBT VXL includes a full keyboard that makes data input a snap. The RBT VXL keyboard allows the operator to enter the BAT identification number, employee's name and identification number, and company name and identification number. The RBT VXL displays the data on the rear-facing display of the Alco-Sensor VXL.

Includes DOT and NRC Protocols

The RBT VXL comes with the Dept. of Transportation (DOT) and Nuclear Regulatory Commission (NRC) protocols programmed into the instrument. This dual-protocol feature means agencies that must perform DOT and NRC testing need only one instrument. The operator selects either the DOT or the NRC protocol at the beginning of the test sequence. The RBT VXL then prompts the operator through the appropriate steps to complete that specific protocol.

Convenient Wireless Testing Eliminates Tether to Printer

The RBT VXL eliminates the hard-wired connection between the Alco-Sensor VXL and the RBT VXL printer when performing the breath alcohol test. This allows the operator to readily use the hand-held Alco-Sensor VXL to test the subject without having to awkwardly drag the printer along at the end of a cable. Eliminating the tether to the printer greatly increases the convenience and comfort for the operator as well as the subject when performing the breath test.

Securely Prints Test Results

To print the test results the operator places the Alco-Sensor VXL into a docking station that is wired to the printer. This fail-safe printing method removes any question about the integrity of the printed test result, and removes the issues that sometimes arise with wireless communication technology.

SPECIFICATIONS

Sensor type: Electrochemical Oxidation (fuel cell)

Range of measurement: .000 - .400 BrAC

Accuracy and precision: U.S. DOT approved for evidential use

Breath sampling: Automatic with manual override

Response time: 3-5 seconds negative results,
5-10 seconds positive results

Power requirement: **Alco-Sensor VXL:** 4AA batteries (included), 1500 tests
DP1012: 12-volt rechargeable battery, 75+ tests
Slip Printer: 120 volt AC

Test mode: Direct

Calibration: Microprocessor controlled, using gas or wet bath simulator

Memory: 1,000+ tests, browse memory, reprint any test

Print capability: Yes, with Thermal or Slip Printer

Temperature range: 0 – 50°C

Size: 14" X 14" X 5", 12 lbs. (in Nylon carrying case)

Warranty: Two year parts and labor
