Alco-Sensor VXL

DOT
Version

One-handed Operation

The one-handed design also allows right hand and left operation for ultimate flexibility. The operator navigates the test menus by pressing the two buttons on the back and a single button on the front of the instrument.

Now with Two-Year Factory Warranty

Intoximeters now offers a two-year factory warranty for the DOT version Alco-Sensor VXL. Intoximeters has also extended a two-year warranty for the biannual factory recertification of the instrument. This means that by taking advantage of the biannual instrument recertification the user can ensure that their Alco-Sensor VXL will never be out of warranty!

Stores Thousands of Test Results

Robust memory features of the Alco-Sensor VXL allow the instrument to store thousands of test results. The operator can browse the test results stored in the instrument and re-print selected tests. The optional Accelerator software program facilitates uploading of test results to a computer to create a database and reports of test results.

Wireless Testing, Secure Printing

To print test results the operator places the Alco-Sensor VXL in a printer dock that is connected by cable to a printer. This method allows the operator to test subjects without being tethered to a printer while testing the subject, yet produces a secure connection to the printer when printing. The Alco-Sensor VXL is compatible with several serial printers, including the Martel and the Slip Printer.
